

Q1 Are you aware that our community is a part of the BC Electric Kick Scooter Pilot Program?

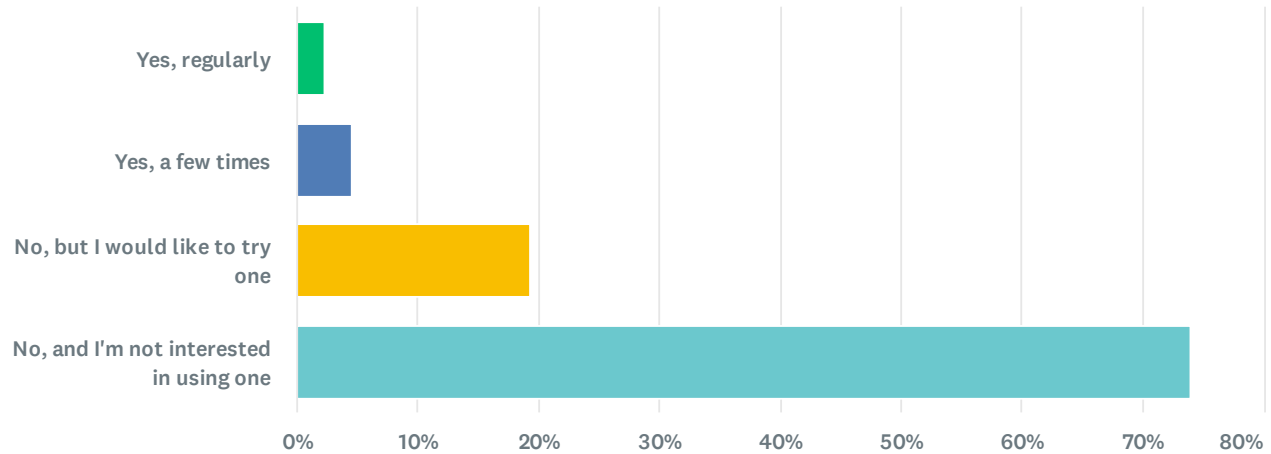

Answered: 222 Skipped: 2

Answer Choices	Percentage	Responses
Yes	63.51%	141
No	36.49%	81
Total		222

Q2 Have you personally used an electric kick scooter in our community?

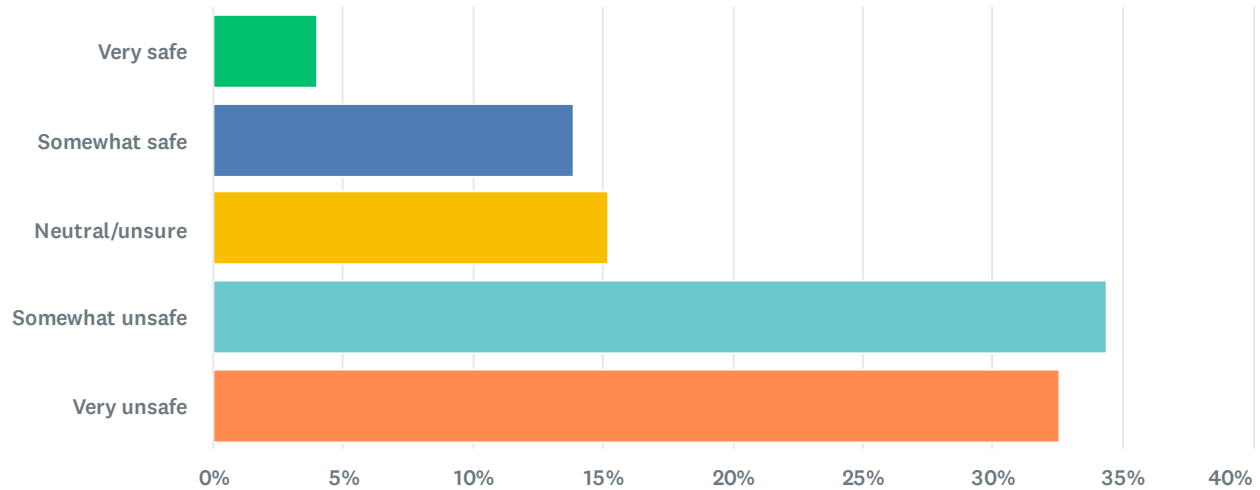

Answered: 223 Skipped: 1

Answer Choices	Percentage	Responses
Yes, regularly	2.24%	5
Yes, a few times	4.48%	10
No, but I would like to try one	19.28%	43
No, and I'm not interested in using one	73.99%	165
Total		223

Q3 In your opinion, how safe are electric kick scooters in our community?

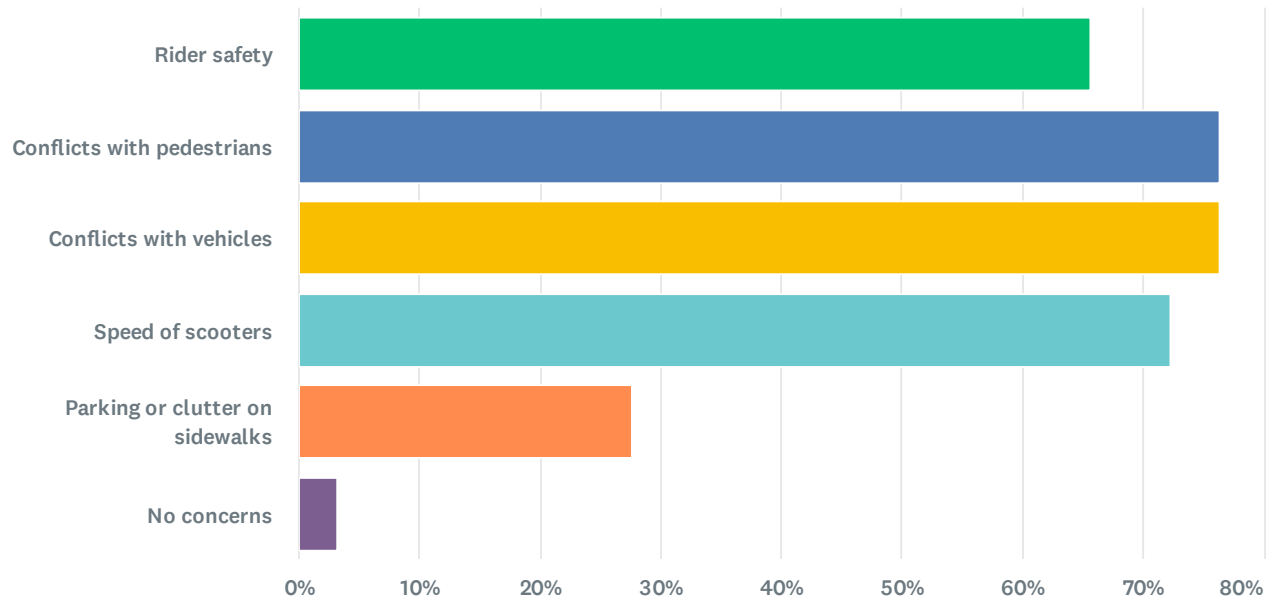

Answered: 224 Skipped: 0

Answer Choices	Percentage	Responses
Very safe	4.02%	9
Somewhat safe	13.84%	31
Neutral/unsure	15.18%	34
Somewhat unsafe	34.38%	77
Very unsafe	32.59%	73
Total		224

Q4 What concerns, if any, do you have about electric kick scooters? (select all that apply)

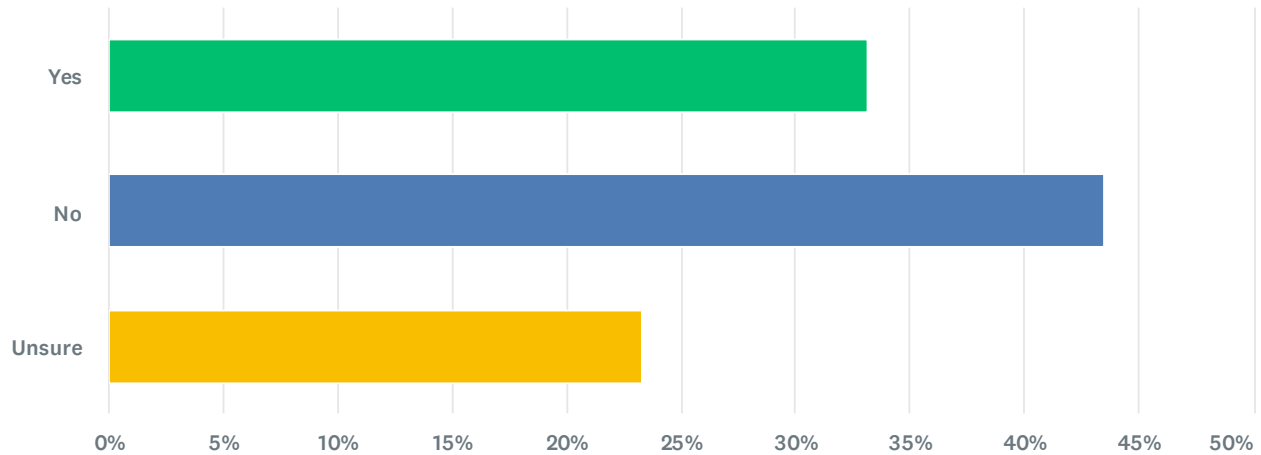

Answered: 224 Skipped: 0

Answer Choices	Percentage	Responses
● Rider safety	65.63%	147
● Conflicts with pedestrians	76.34%	171
● Conflicts with vehicles	76.34%	171
● Speed of scooters	72.32%	162
● Parking or clutter on sidewalks	27.68%	62
● No concerns	3.13%	7
Total		720

Q5 Overall, do you support allowing electric kick scooters to continue in our community after the project ends?

Answered: 223 Skipped: 1

Answer Choices	Percentage	Responses
Yes	33.18%	74
No	43.50%	97
Unsure	23.32%	52
Total		223

Q6 Is there anything else you would like to share about electric kick scooters in our community?

Answered: 138 Skipped: 86

#	RESPONSES	DATE
1	Speed on pedestrian walkways very dangerous for seniors. Some users have no respect for others. Enforcement of rules very necessary	4/17/2026 2:08 PM
2	helmet and age enforcements need to be taken seriously	4/17/2026 11:55 AM
3	Training & written testing to use these scooters (having some sort of licensing to use them in public .	4/17/2026 4:54 AM
4	The safety is a great concern. The other day I saw two young girls, maybe 12 and 13 ripping down the sidewalk and I was doing 50 km an and they where right beside me. What about the other people on the sidewalk and if they go onto the road now you have gotta contend with cars I believe they should have to have a drivers license to ride them on the road. They don't even know the rules of the road at that age. I believe helmet's should be mandatory and safety gear and a drivers license. Like I said, I saw two young girls doubling on one I see that all the time and they were flying. That is just not safe they didn't even have a helmet on.	4/16/2026 8:19 AM
5	We don't have the infrastructure (dedicated lanes, paths).	4/16/2026 7:18 AM
6	support continued use as long as safety rules are implemented. They are very fast, quiet and used on sidewalks along side people walking with no indication they are coming up behind to pass. Very dangerous.	4/14/2026 2:29 PM
7	Scootering is a great way to get around and it keeps more cars off the roads meaning less congestion in the cute little town for the roads and parking! Lots of visitors would rather leave the car at the motel and scooter to the beach, AND they are better for the environment. They are a win- win. Anybody who doesn't like them is probably just jealous because they are too uncoordinated to ride one. Don't be shy, give it a try! They are fun and convenient & they are just as safe as a bicycle!	4/14/2026 10:24 AM
8	Using an electric kick scooter is similar to riding a bicycle. Properly maintained roads are important for safety. Debris (such as rocks) on the side of the road can be dangerous for scooters and bikes. The roads should be cleaned on a regular basis to clear rocks and other debris.	4/14/2026 9:14 AM
9	Seems some riders are not respectful of pedestrians, motorists or rules	4/13/2026 12:06 PM
10	The age restriction need to be enforced, one sees many young children riding e-scooters without safety equipment and a phone in one hand and riding down the middle of the road into a blind corner. Good luck!	4/11/2026 3:50 PM
11	Generally speaking it is Not required in Osoyoos - and if it is for seasonal tourists it will just be dangerous and another thing to regualte in this town - we don not need it - people tend to walk or have their own bikes or boats - leave the scooters for cities that like to clutter up their sidewalks and raodways with silly toys	4/10/2026 1:48 PM
12	They don't seem to be patrolled just make their way amongst pedestrians on the sidewalk are they for the road or not	4/10/2026 12:59 PM
13	Appreciate the recent public meeting with the police and community on scooters. Unfortunately I wasn't able to attend. Public information and conversations are always helpful. Thank you	4/10/2026 6:49 AM
14	Safety of Seniors with limited mobility, use of scooters at Sonora, use of scooters in middle of the night on Main St. Lack of helmet use.	4/9/2026 7:29 PM
15	Have the speed of them governed they go way too fast now	4/9/2026 6:11 PM
16	they should have similar rules as cyclists and not be allowed on sidewalks!	4/9/2026 7:32 AM

Electric Kick Scooter Pilot Program

17	I have had to step off of a sidewalk more than once because of people riding r-scooters. Also, I don't think they should be allowed on m	4/9/2026 7:05 AM
18	Regulation of helmets, speed and where they can be used	4/8/2026 10:44 PM
19	No, thank you.	4/8/2026 8:06 PM
20	Age limit. No to 16 & under	4/8/2026 10:55 AM
21	Even though they are somewhat of a hazard, I believe there are many people who use them and rely on them to get around for everyday activities.	4/8/2026 10:10 AM
22	They should be licenced & insured.	4/8/2026 9:53 AM
23	No	4/8/2026 9:36 AM
24	Teaching programs for safety purposes, monitoring, maybe there needs to be a test (similar to a driver's licence)	4/8/2026 9:11 AM
25	You just informed us about the rules where the electric kick scooters can be used and where not. However, nobody is enforcing these rules so these scooters are being used wherever they want!	4/8/2026 8:36 AM
26	E-scooters are a futuristic technology we should support because they help people move easily from one place to another. They're not just for fun — they're an important mode of transportation for people who can't afford a car. They're also a better option for taxpayers. Why spend more money on expensive buses when e-scooters can serve people of all ages? I even see older adults using them. I'm over 60 myself, and I love this affordable and beautiful way of getting around.	4/8/2026 8:34 AM
27	I live in a house on 62nd Ave the speed these scooters come down the hill is frightening. Definitely scary pulling out our driveway as riders have no idea how easy it is to hit them. They ride in the middle of the road and when on the sidewalk do not slow down when passing you	4/8/2026 8:23 AM
28	We are a resort community, and remaining current with new and emerging things for the public is important	4/8/2026 8:12 AM
29	Need a Dedicated bike lane parallel to Main Street and over bridge	4/8/2026 7:51 AM
30	they go too fast	4/8/2026 7:46 AM
31	The speed when the rider is passing a walker on the sidewalk. As a step side ways not hearing a scooter coming and people will get hurt. Also the use of wearing helmets	4/8/2026 6:15 AM
32	There will need to be considerable adjustments all around for this pilot to be successful as a result in an increased number of otherwise unlicensed, untrained and little-regulated users taking to our streets and sidewalks. Already there are challenges posed by users . . . of ALL ages . . . on bicycles, kick scooters and electric scooters . . . demonstrating a wide range of "knowledge, skill AND attitude". Increased "policing"/bylaw enforcement will be required for safety as well as combatting the tendency of some "alternate users" to use the streets, lanes and sidewalks for "somewhat free-for-all use! That will be challenging, time-consuming and costly . . . but necessary.	4/8/2026 12:04 AM
33	It's the future ! Like it or not, there will be more and more EV type vehicles. Scooters, bikes , cars, boats, paddle boards, humanoid robots, grass cutters , fruit picking equipment..... it's all coming	4/7/2026 9:50 PM
34	No	4/7/2026 9:06 PM
35	Stop letting old people with nothing better to do but complain to create rule after rule until it's illegal to walk down the street	4/7/2026 8:43 PM
36	E scooters are 16 years and up. Why are there so many under that age riding them and who is suppose to enforce those laws? I have had to many close calls with adults and under 16 years that ride them. They should have to follow the rules just like everyone else.	4/7/2026 8:02 PM
37	The age of people using them is too low. I think they are an accident waiting to happen.	4/7/2026 7:15 PM
38	In a community that's mostly seniors the idea of having people running around in scooters all over the place. It's ridiculous.	4/7/2026 7:11 PM

Electric Kick Scooter Pilot Program

39	There should be a minimum age. What that age is, I don't know	4/7/2026 7:05 PM
40	In other communities my experience has been most riders don't wear a helmet and visits to the ER increase during summer with broken bones and head injuries. Osoyoos lacks a reliable ER to deal with an increase this will cause. Unless you are sending bylaw around to enforce the rules and make sure scooters are not laying around blocking sidewalks and bike paths then it isn't a great idea. It works in bigger cities where the young workforce uses them to commute. In Osoyoos they will use them when drunk to avoid getting a DUI.	4/7/2026 6:54 PM
41	I have personally seen a kid on a scooter run into a truck (many witnesses) and in the end the driver was charged . Absolutely insane. The kid also had a backpack full of beer	4/7/2026 6:27 PM
42	They do not abide any of the rules of road and a danger on the pathways. No one polices or monitors them.	4/7/2026 5:58 PM
43	During my commute to work I've had numerous young people cut in front of my vehicle from side streets, ignoring stop signs and traveling at full speed. This has happened so frequently that I have installed a dash cam. I'm worried that this kind of failure to follow the rules of the road is going to have tragic consequences.	4/7/2026 5:39 PM
44	They must follow all the rules of the road that apply to motorized vehicles.	4/7/2026 5:30 PM
45	From what I've observed, the young people who primarily use these scooters have no sense of concern for pedestrians, vehicles or even themselves. I rarely see any of them wearing a helmet. They ride on sidewalks FAR too fast. I believe scooters and e bikes should be licensed and that riders should have to be trained and tested. Stupidest transportation appliance to have ever been invented.	4/7/2026 5:19 PM
46	I think it's only a matter of time before someone gets very hurt on these things. I see them everywhere. Riding double. No helmets. On and off the highways. Colliding with pedestrians. No enforcement ever seen. No one knows what the rules are.	4/7/2026 5:00 PM
47	I have noticed that private scooters do not have bells to notify pedestrians that they want to pass. It needs to be mandatory that scooters have these bells to assist with avoiding pedestrian collisions. Helmets need to be to worn and age limits enforced.	4/7/2026 4:45 PM
48	Unsafe- I do not want them in Osoyoos	4/7/2026 4:42 PM
49	Safety is my biggest concern, for riders, drivers and pedestrians. How will everyone's safety be maintained.	4/7/2026 4:23 PM
50	Crosswalks are very dangerous. The speed of the scooter can surprise a driver of a car and end up in a collision in a cross walk.	4/7/2026 4:10 PM
51	They appear to have total disregard for vehicle traffic and all traffic signs put in place to protect the safety of everyone.	4/7/2026 3:51 PM
52	For the most part, People currently using electric scooters have a complete disregard for safety on the road. Not visible, no helmets, and they do not adhere to the rules of the road. Excessive speed is another issue. A collision just waiting to happen. I've seen a few good operators, but just a few!	4/7/2026 3:44 PM
53	Concerned about the speed around pedestrians especially seniors who may not hear them coming	4/7/2026 3:38 PM
54	I believe if they're gonna drive them on the street they should have a drivers license and full safety gear. I see them running two people on them. They go 50 km an hour and neither one of them has any safety here not even a helmet for God sakes and they looked like they're 12 years old they they don't even know the rules of the road.	4/7/2026 3:32 PM
55	I am concerned about the younger generation not wearing helmets.	4/7/2026 3:29 PM
56	Kids riding fast with no knowledge of road rules, flying through intersections without looking, using crosswalks and sidewalks, riding without helmets and often doubling another young child!	4/7/2026 3:28 PM
57	Mandatory helmets and congested area speed limits	4/7/2026 3:21 PM
58	Do they come with mandatory helmets?	4/7/2026 3:16 PM

Electric Kick Scooter Pilot Program

59	I was almost hit by one that came up behind me on the sidewalk. I also had one fly out in front of me as I was pulling out of a parking lot.	4/7/2026 3:14 PM
60	The speed that people ride them I believe should be restricted to a certain speed limit. Helmets should be mandatory and only 1 rider on scooter allowed.	4/7/2026 3:04 PM
61	Please make sure vendor picks up abandoned scooters every night, in some other communities scooters are left everywhere and it doesn't present well as a clean town.	4/7/2026 2:54 PM
62	Too many persons speeding with the traffic, even in the evening with no lights.....no helmets.....should not be allowed on sidewalks, but maybe a bike lane is needed in Osoyoos. And rules need to be enforced.	4/7/2026 2:50 PM
63	Too many kids riding without helmets and with passengers. Can't hear them when they come up suddenly behind you on a sidewalk. They speed and have no lights at night	4/7/2026 2:44 PM
64	Too many not wearing helmets. Very disruptive to sidewalks, one ran into my dog on a sidewalk not a pathway or bike path but an actual sidewalk. Lack of enforcement huge issue	4/7/2026 2:38 PM
65	More awareness and public engagement. Possibly with schools, to help with safety	4/7/2026 2:31 PM
66	This is a community of elderly people. I believe these scooters endanger their health and safety.	4/7/2026 2:11 PM
67	So far, the riders I have encountered have absolutely no concern nor consideration for people on the sidewalks. Someone is going to get hit. They need drivers' ed for scooters before they should be allowed to be on our streets and/or sidewalks.	4/7/2026 2:10 PM
68	should stay off the sidewalks, wear protective gear, is the speed controlled to only go so high	4/7/2026 2:07 PM
69	They should not be allowed on sidewalks or by children under the age of 16	4/7/2026 2:05 PM
70	The electric kick scooters is not the problem it is the operators and the unsafe way they use them. Any one operating one should have to pass a safety test and a road test the same as a motor cycle	4/7/2026 2:02 PM
71	This is a tourist town and its important that we accommodate tourists as well as our own residences. With gas prices why not use an electric scooter or electric bike.	4/7/2026 2:00 PM
72	What training/licensing is required of a rider, OR does the only training take place in traffic? Bicycles are not allowed on sidewalks, why should it be any different for kick scooters? Though it is possible for cars and trucks to swerve in and out of traffic, for the most part these are large enough to be noticed by other drivers, who have the time required to compensate for these sudden motions. Kick scooters are much less likely to be noticed by other drivers and far more likely to cause an accident! Do operators of kick scooters pay a road tax? If not, being a motorized vehicle, shouldn't they? Will authorized safety helmets and other such safety equipment be a requirement to legally drive a kick scooter within Town limits? These are required by law even for riding a bicycle and are strongly suggested even at the local skate board facility, where there is no chance of being involved in a collision with a car or a truck! How many other towns/cities in the country/world have been studied for potential and ongoing problems with allowing electric kick scooters within their boundaries??? More than a few I'm assuming!	4/7/2026 1:59 PM
73	There needs to be a really strong waiver and enforceable laws for breaching the safety rules	4/7/2026 1:56 PM
74	I think they're good for tourists, and have no problem with them when they're put where they belong.	4/7/2026 1:48 PM
75	Although I support allowing electric scooters in our community, I believe they must be speed limited both mechanically/electrically and by law enforcement (particularly on pedestrian/bike paths), riders must be helmeted, and they should have a loud noise device to communicate their approach when coming up from behind pedestrians.	4/7/2026 1:47 PM
76	There needs to be a slower speed with them, helmets mandatory and off the sidewalks for pedestrian safety	4/7/2026 1:43 PM
77	If we were able to enforce the safety rules for riders and NOT allow them on the Highway or sidewalks I might be open to allowing the use in the community. however most riders are tourists and are NOT aware that main street and the highway are actually a HIGHWAY.	4/7/2026 1:38 PM

Electric Kick Scooter Pilot Program

78	Set maximum speeds in areas where pedestrians frequent	4/7/2026 1:35 PM
79	They are dangerous and all electric bikes and scooters should be banned from town streets.	4/7/2026 1:32 PM
80	Do not allow the scooters on the streets /	4/7/2026 1:32 PM
81	They should only be allowed on roads and obey the laws of cars	4/7/2026 1:26 PM
82	As a driver, I see SOME scooters recklessly, weaving in and out of traffic, or travelling at, what appears to be, high speeds, and not wearing helmets. Just last week a couple young kids possibly as young as 7 or 8, ripping up and down the street on e scooters. Thankfully, this is a quiet street, in general, but these kids seemed awfully young to be operating something with a motor.	4/7/2026 1:23 PM
83	Kids need education,,, A girl left the sidewalk onto the road right in front of me,, I had to slam on my brakes! Very upsetting,	4/7/2026 1:20 PM
84	Helmets.....!!	4/7/2026 1:16 PM
85	Have not used the community's electric kick scooter but I had my own electric bike which would be very similar, I assume, and the same rules should apply to both	4/7/2026 1:14 PM
86	Scooter speeds can be manipulated using a smart phone. Speed restrictions need firm enforcement. No scooter rider should be under 16 years of age.	4/7/2026 1:13 PM
87	Would love to take advantage, I've only seen them at hotels. More info on where scooters can be left and picked up would be great	4/7/2026 1:05 PM
88	Scooter drivers are reckless drivers. They drive on sidewalks and then streets, whatever suits them. They do not follow the rules of the road. They hurt people.	4/7/2026 1:03 PM
89	re question 5, yes if the riders use common sense, no if they think that rules don't apply to them.	4/7/2026 12:57 PM
90	Helmets should be implemented for rider safety. Riders need to be educated on proper use on the road and sidewalks. Speed should be limited.	4/7/2026 12:57 PM
91	there should be more fines given out for no helmets , doubling , going to fast on sidewalks. Scooter drivers come up on to pedestrians way to fast and then pass when not safe also some kids are to young to be driving one. MORE EDUCATION NEEDED	4/7/2026 12:55 PM
92	my only problem is with the sound. They are extremely quiet. If they come up behind you, there should be a horn or bell sounding.	4/7/2026 12:48 PM
93	Primarily concerned with young kids charging around unaware and at high speeds with no consequences or enforcement- I see it all summer long. Very concerning.	4/7/2026 12:46 PM
94	Ban them, the kids are crazy that ride those someone is going to get killed if you allow them to weave in and out like they do	4/7/2026 12:45 PM
95	I responded no to having the program continue. However, it would change to a yes if the users acted responsibly.	4/7/2026 12:44 PM
96	Not sure if covered or not when they are rented ; they should be clarifying and pointing out not to ride on the road amongst cars. Cyclists know the road rules but a lot of the ones used are by young kids under the level vehicle driving age.	4/7/2026 12:43 PM
97	Unless there is a licensing requirement- driver/owner/ age/respect of all transportation requirements- they ride all over the sidewalks at great speed - at any age - maybe keeping them to the bike lane off sidewalks would be less dangerous-	4/7/2026 12:42 PM
98	It really needs proper enforcement to work. Without it it will degrade.	4/7/2026 12:40 PM
99	Our sidewalks are becoming unusable and we quite often have to walk on the road to avoid bicycles and scooters using the sidewalks. We are seniors and do not want to get injured again. We drive into town now instead of walking. Sad situation and nothing will be done.	4/7/2026 12:39 PM
100	Because of the high elderly population in Osoyoos and seemingly high density of mobility impaired, I am most concerned about the risk of injury due to added 'vehicle' use and speed of the scooters that I have personally seen weaving around other vehicles and pedestrians.	4/7/2026 12:39 PM

Electric Kick Scooter Pilot Program

Recommend monitoring hospital and clinic visits for any injuries that occur. Also recommend observing the pattern used by the scooters in this community.

101	Scooter riders are a hazard to pedestrians and pets. The walkways are no place for a scooters	4/7/2026 12:39 PM
102	The rules should be no different than bicycles	4/7/2026 12:37 PM
103	They should not ne permitted on roads and speed should be limited for pedestrian on sidewalks.	4/7/2026 12:31 PM
104	Don't over think this! As the city dies with everything. Travel a bit and recognize that scooters are available almost everywhere! People get hurt, people get hurt riding bikes, running, in cars, walking. Do this and get the town going again, council is stifling growth and tourism as they stifle everything. I guess the final say with come from the hotels as they have a say in everything. Remember air bb ya, you know what I am talking about.	4/7/2026 12:29 PM
105	If the rules are "rider beware" than I have no issue.	4/7/2026 12:28 PM
106	They are definately not safe & they travel fast as well as it's mostly young kids on them.	4/7/2026 12:27 PM
107	I have concerns about pedestrian safety as e-scooters travel on sidewalks. This happens with locals and visitors alike. Residents may know the restrictions but how do visitors know our rules. I have encountered on more than one occasion e-scooters on sidewalks. Ions example there were two youths on the sidewalk and I was unable to pass them. Right behind them was their mother was on the sidewalk. E- scooters are a great way to get around town but difficult to regulate given Bylaw Officers limited enforcement capabilities. I'll be interested to see how pedestrian safety is monitored, addressed, and reported to residents diring and after the pilot project. Also I have not heard the length of this pilot program.	4/7/2026 12:27 PM
108	The riders are not educated enough for their own safety, and that if others	4/7/2026 12:25 PM
109	Ive seen people with them on the highway. I've clocked a kid doing 60 k on the west side of the east side of the bridge. Seen them weaving in and out of traffic. People with no helmets down the centre of the lane. I believe it is only a matter of time for a death or very serious accident to happen. Better Reg's, rules and limitations are needed before regular use is allowed	4/7/2026 12:25 PM
110	I saw your sidewalks and roadways are busy enough with pedestrian bicycle truck and car traffic adding this physically small scooter is problematic. It becomes yet another item for everyone to look out for , avoid collision. Our Main Street is a provincial highway. We should not encourage physically small items like scooters and bikes to be used there.	4/7/2026 12:24 PM
111	I am at an age where I do not want to risk hurting myself on an electric kick scooter.	4/7/2026 12:19 PM
112	No one seems to be enforcing the 18 and over and use of helmets rules.	4/7/2026 12:17 PM
113	Never see riders wearing helmets or following road safety rules	4/7/2026 12:17 PM
114	No, said enough	4/7/2026 12:15 PM
115	Safety of the rider. without helmets and too young	4/7/2026 12:13 PM
116	Locals and tourists need to ware helmets and using your phone while riding on the road or sidewalk should be illegal and needed attention by our local rcmp	4/7/2026 12:12 PM
117	Most danger comes from inexperienced riders. Same as a motorcycle. It takes skill and practice to ride an electric scooter. One needs to learn to turn, brake hard, and be aware of everything.	4/7/2026 12:12 PM
118	Too much congestion already in Osoyoos during tourist season, from pedestrians, vehicles, bikes and cars. How about some proper lighted street crossing? Scooter also dont follow the rules, running stop signs, discard for vehicle traffic.	4/7/2026 12:09 PM
119	They are using the sidewalk at 20-30 mph You can not hear them coming behind you Parents and young children are not wearing helmets- police just drive on buy	4/7/2026 12:09 PM
120	At the moment , they ride with no rules , no helmet and no safety marking for the most part. I find it a bit shocking parents do not insist on their kid wearing a helmet , but you can't fix stupid . After the pilot we can make more recommendations !	4/7/2026 12:07 PM
121	I would support them if there was an enforceable speed limit, as well as enforcement to keep	4/7/2026 12:06 PM

Electric Kick Scooter Pilot Program

them off pedestrian sidewalks. I support scooters that are limited to 15kmh, and limited to use on roads and designated bicycle paths. However I do not believe the community or policing groups have resources to enforce, therefore I am 100% opposed.

122	They would be fine if we had a special lane and that fines and tickets handed out when appropriate.	4/7/2026 12:05 PM
123	More lanes or paths for scooters, bikes, and similar vehicles could improve safety	4/7/2026 12:04 PM
124	requires an increase in sidewalk use enforcement	4/7/2026 12:03 PM
125	November osoyoos election 2026	4/7/2026 12:02 PM
126	Personally observed in Osoyoos that e-scooters are ridden on sidewalks by various ages, including downtown, many riders are under 16, and most riders do not wear helmets. It also appears that there is absolutely no enforcement. Only a matter of time until there are serious injuries and fatalities.	4/4/2026 10:43 AM
127	These devices have no business on roadways. They pay no tax, licensing, gas tax. They are extensively used by children under age 16 and often without helmets. they are a menace and someone is going to badly injured or killed, and the Town will be to blame.	4/3/2026 4:26 PM
128	This is a good start; but the rules/laws need to be better disseminated and enforced if this program continues	4/2/2026 9:55 AM
129	Yes I think all types of transportation is dangerous. Even walking. At least this takes up less room than a car, is clean energy, fun etc and promotes maybe walking one way. Scooting one way.	4/1/2026 8:16 PM
130	Too many young children are using the scooters illegally. I have also seen two kids on a scooter, younger one hanging on in front. The kids ride their scooters at night and are often dressed in black so not able to be seen. Way too dangerous in our community.	4/1/2026 8:52 AM
131	What happen to the ebike meeting,nothing about ebikes	4/1/2026 6:21 AM
132	not once on my many walks on the sidewalk along Hwy 3 has a person on an escooter ever rung a bell, buzzer, or called out that they were coming up behind me. Only one young child wore a helmet - definitely under 16 and she crashed on the walkway.	4/1/2026 5:42 AM
133	Scooters do not belong on the sidewalks with pedestrians.	3/31/2026 9:51 PM
134	Check with the E.R. doctors in Kelowna; they have had lots to say about these dangerous forms of transport; likely other hospitals as well. They provide NO form of exercise either; terrible for young people who NEED to get exercise. I say a big NO to E-scooters!	3/31/2026 9:13 PM
135	In my opinion 95% of escooter user do not comply with any of the rules. From being underage, a menace to both pedestrians and vehicles, use on prohibited sidewalks and roads and I could go on.	3/31/2026 8:03 PM
136	Concerns above as listed Riding on sidewalks should not be allowed	3/31/2026 7:47 PM
137	Sparrow scooters in Osoyoos does not enforce safety regulations and on occasion even contradict pilot project rules and laws on their app. The last few years I have questioned them and the host locations about not supplying equal numbers of helmets to scooters and given nothing but excuses with no corrective actions taken. They willfully chose to not provide enough helmets for their scooters. Please endorse a company that takes safety seriously and focuses on community accessibility not just tourism transportation.	3/31/2026 7:10 PM
138	I think more education needs to go in around safety - I see many young kids flying down the roads without helmets on and not following rules of the road. I think scooters are safe and efficient and DO NOT support further regulations -but the focus should be on safety	3/31/2026 4:11 PM
